PREFACE

This report was prepared under Contract No. 232-80-0057 between the Association of Schools of Public Health and the Department of Health and Human Services, Public Health Service, Health Resources Administration, Bureau of the Health Professions. The purpose of the report is to provide the Federal Government with relevant data regarding Schools of Public Health, their students and faculty, and to serve the Schools as a management tool for planning, administration and program evaluation.

Many individuals contributed to the development of this report. From September 30, 1980 to November 30, 1981, the data was collected under the direction of Eva Jakso Perlman, M.P.H.; she was assisted by Steve Howard, Research Assistant; Mary Lou Licwinko, M.H.S.A., Staff Associate; and William B. Parsons, M.S.P.H., Project Consultant. The final report was written by Judith H. Magee, Ph.D.

In addition, we would like to thank the following individuals for their advice and counsel:

Liaisons from Schools of Public Health

Terry Habshey
Office of the Dean
Department of Public Health
University of Alabama at Birmingham

G. Nicholas Parlette, MPH
Associate Dean
School of Public Health
University of California, Berkeley

Glenda Baker
Administrative Analyst
School of Public Health
University of California, Los Angeles

Michael O'Connor
Assistant Dean for Administration
School of Public Health
Columbia University

Sue Robinson
Registrar's Office
Harvard School of Public Health

Wendy Craytor
Assistant to the Dean, Student Services
University of Hawaii at Manoa
School of Public Health

James W. Wagner, MA
Assistant Dean for Student Affairs
School of Public Health
University of Illinois Medical Center

Anne C. Bremner
Director, Administration Projects
School of Hygiene and Public Health
Johns Hopkins University

Margaret Wilhelm
Assistant to the Dean
School of Health
Department of Health Education
Loma Linda University

William A. Darity, MSPH, PhD
Dean, School of Health Sciences
Division of Public Health
University of Massachusetts

Don P. Haefner, PhD
Assistant Dean and Director of Admissions
and Student Affairs
School of Public Health
University of Michigan

Edith D. Leyasmeyer, PhD
Associate Dean

Director, Office of Student Affairs
Graduate School of Public Health
University of Pittsburgh

ABSTRACT

Each of the 21 Schools of Public Health distributed standard forms to its faculty members in the Fall of 1980. 1,644 faculty members responded to the survey.

The specific information on faculty in Schools of Public Health requested in the statistical data instruments included the following:

- Sex
- Age
- Race
- Full-time/Part-time Status
- Degrees Earned
- General Field of Education
- Year of Initial Appointment
- Title
- Joint Appointments
- Area of Specialization
- Current Area of Work
- Percentage of Time Devoted to Teaching, Administration, Research and Consultation

SELECTED FINDINGS

The Association of Schools of Public Health was awarded a contract to develop and administer a methodology and data collection instrument and prepare a report profiling faculty employed in the 21 U.S. Schools of Public Health during the academic year 1980-81. This report presents a summary of those findings.

The faculty statistical form attached in Appendix II was used in a previous project. The major change in the data instrument was the inclusion of the definitions of specialty areas developed in 1977 by an ASPH Ad Hoc Committee, and approved by the ASPH Executive Committee in early 1979.

Each School distributed standard forms to faculty. Upon completion, the School administration verified requested information. Thereafter, forms were forwarded to the ASPH Data Center where staff coded the information for computer processing. The data processing staff at the University of North Carolina compiled the information, developed frequency distributions for evaluation as to completeness and accuracy and generated data printout tables. The data printout tables were subsequently analyzed by ASPH Data staff, and a report profiling the 1980-81 U.S. Schools of Public Health was compiled.

Data was collected on 1,644 faculty members in the 21 Schools. Tables 1-16 represent aggregate data for all the Schools on selected faculty characteristics, while the remaining tables (Appendix I) contain data broken down by individual Schools.

This section will discuss pertinent information illustrated in the aggregate tables. Faculty studies have been conducted as part of the Data Project since 1974, with the exception of the 1979-80 academic year, and some comparisons will be made with the data from previous years.

Race by Sex--Table 1

Of the 1,644 faculty members included in the study, 73% (1,200) were males and 25.4% (418) were females (1.6% unknown). This is about the same ratio as that reported each year since 1974. Among Hispanic faculty members, females constituted one-third of the total Hispanic faculty and among Asian faculty the percentage of females dropped to 19%.

Non-White faculty constituted 12.2% (201) of the total. There has been a slight increase in the percentage of non-White faculty since 1974, when it was 10.6% of the total. Asian faculty members comprised half of the non-White faculty group (100 or 6.1% of the total faculty).

Age by Sex--Table 2

The median age of all faculty was approximately 44; for males it was also 44 and for females it was a little less than 43. 38.4% of the faculty were under 40 years of age, 26% were between 40-50, 22.8% between 50-60 and 11% over 60 years of age. The largest single age group was 35-39, which constituted 19.7% of the total.

Year of Initial Appointment--Tables 3 and 4

About 50% (820) of the total faculty were appointed to their Schools before 1975, with the remaining 48% (792) being appointed in 1975 or later (2% unknown). This is similar to the data from previous years, where approximately half of the faculty had been appointed to their particular School within the five preceding years. In a breakdown by sex, 41% of the female faculty were appointed before 1975 compared to 53% of the male faculty. Among non-White faculty, 47% were appointed before 1975.

Activities Performed by Faculty--Table 5

A. Teaching. Of the 1,644 faculty, 1,531 (93%) were involved in teaching. Of this number, 67% spent less than half of their time in this activity. Only 14 faculty members were engaged in teaching full-time, while the largest single group (277 of 1,531) spent 20-29% of their time teaching.

B. Administration. 1,210 faculty (74%) performed some administrative activities. Of this group, 69% spent less than a third of their time in this activity, while the largest single group (380) spent 10-19% of their total time in administration. There were 12 faculty members who spent 100% of their time in administrative activities.

C. Research. 1,401 faculty (85%) performed research activities. Of this number, about half (56% or 791) spent between 10-50% of their time in research. 50 faculty members spent 100% of their time in research activities.

D. Consultation. 1,075 faculty (65%) performed consultation activities, although of this number 80% (864) spent less than 30% of their time in this activity. The largest single group (401 or 37%) spent from 10-19% of their time on consultations.

Full-time/Part-Time Status--Tables 6 and 7

The Data Project defines a "full-time" faculty member as one employed by the School for a minimum of 80% of the average working week. Of the 1,644 faculty, 84% were employed full-time and 16% part-time. A breakdown by sex revealed the same distribution. Among non-White faculty, 91% were employed full-time and 8% part-time. Since 1974 there has been a steady increase in the percentage of faculty employed full-time (70% in 1974).

Primary Area of Specialization--Tables 8, 9, 10, 11 and 12

Of the 1,644 faculty (Table 8) the largest group (310 or 19%) were in areas of specialization classified as "other." Of the specializations listed, the greatest number of total faculty were in the areas of Health Services Administration (14.4%), Biostatistics (11.7%) and Epidemiology (10.6%) respectively.

For male faculty, the distribution was essentially the same as given above, except that Environmental Sciences (10.6% of males) would rank in third place ahead of Epidemiology (10.1% of males). For female faculty, the largest groups were Public Health Practice & Program Management (14.4% of females), Epidemiology (12.7% of females) and Health Services Administration (11.7% of females), respectively. The greatest differences between male and female faculty occurred in the areas of Public Health Practice & Program Management (14.4% of females vs. 4.3% of males) and Environmental Sciences (10.6% of males vs. 2.2% of females).

For non-White faculty (Table 9), the largest groups were Biostatistics (15.9%), Environmental Sciences (8.5%), Nutrition (8.5%) and Health Education (8.4%), respectively. The greatest differences between White and non-White faculty were in the areas of Health Services Administration (15.3% of Whites vs. 7.5% of non-Whites) and Epidemiology (11.5% of Whites vs. 5.0% of non-Whites).

With regard to joint teaching appointment (Table 10), 27% of the total faculty held joint appointments. This was also the case for most of the individual areas of specialization. Biostatistics (16.1%) and Health Education (14.1%) had the least percentage of faculty with joint appointments, while Epidemiology (33.1%) and Public Health Practice & Program Management (32.1%) had the most.

The data on field of education (Table 11) reveals that 29.2% of the total faculty had an educational background in Health Sciences. Math-Statistical Sciences (13%) and Behavioral-Social Sciences (11.4%) were the second and third largest categories. As demonstrated by Table 11, there was a high degree of correlation between field of education and area of specialization. The percentage of faculty in each of the field of education categories has remained fairly consistent since 1974. The biggest difference has been in the Math-Statistical Sciences category; in 1974, 9% of the total faculty had a background in this field.

Regarding current area of work (Table 12), 20% of the total faculty were in the Health Sciences, 15.7% were in Administration & Planning and 12.6% were in Math-Statistical Sciences. The categories of "other," "more than one area of work" and "unknown" contained 15.3% of the total faculty. The areas of work with the smallest percentage of faculty were Physical Sciences (0.9%) and Information Sciences (1.2%). Other areas of work included Chemical Sciences (4.5%), Behavioral/Social Sciences (6.4%), Education/Public Health Education (7%), Environmental Sciences (8.2%) and Biological Sciences (8.3%).

The proportion of faculty in each of the current areas of work has remained essentially the same since 1974. Math-Statistical Sciences (9.5% in 1974) and Chemical Sciences (2.3% in 1974) have shown slight increases and Administration & Planning (20% in 1976) has shown a slight decrease over the years.

Titles Held in Schools of Public Health--Tables 13, 14, 15 and 16

There were a total of 1,865 titles reported for the 1,644 faculty included in the survey. In the teaching categories 30.5% (501) of the total faculty were Professors, 23.3% (383) Associate Professors, 27.9% (458) Assistant Professors, 4.7% (77) Instructors and 6.1% (101) Lecturers. In the administrative categories, there were 107 (6.5%) Department Chairmen, 25 (1.5%) Associate Deans, 18 (1.1%) Deans and 9 (0.6%) Assistant Deans.* In the research categories there were 81 (4.9%) Research Associates and 3 (0.2%) Research Assistants. 102 faculty (6.2%) held other titles.

The proportion of faculty holding the titles of Professor, Associate Professor and Assistant Professor has increased steadily since 1976, when 26% of the faculty were Professors, 18.8% Associate Professors and 22% Assistant Professors. The proportion of Instructors has remained the same, while the percentage of Lecturers has leveled off at about 6% since 1977 after a high of 9.6% in 1976. The percentage of faculty in the administrative categories has remained the same, while the percentage of faculty in the research categories has declined.

*NOTE: Several of the heads of Schools of Public Health do not have the title of "Dean."

Male faculty held 88.1% of the administrative titles, 74.1% of the teaching titles and 52.4% of the research titles (males constituted 73% of the total faculty). Of the 1,126 males with teaching titles, 40% were Professors, 26.8% were Associate Professors, 25.4% were Assistant Professors, 3% were Instructors and 4.8% were Lecturers.

Female faculty held 10.7% of the administrative titles, 24.5% of the teaching titles and 45.2% of the research titles (females constituted 25.4% of the total faculty). In the administrative categories, there was 1 female Dean (of 18), 5 Associate Deans (of 25), 3 Assistant Deans (of 9) and 8 Department Chairmen (of 107).

Of the 372 female faculty with teaching titles, 10.5% were Professors, 21% were Associate Professors, 45.4% were Assistant Professors, 11.6% were Instructors and 11.6% were Lecturers. By category, females constituted 7.8% of the total number of Professors, 20.4% of the Associate Professors, 36.9% of the Assistant Professors, 55.8% of the Instructors and 42.6% of the Lecturers. In the research categories, there were 36 female Research Associates (of 81) and 2 Research Assistants (of 3).

Non-White faculty (Table 14) held 8.8% of the administrative titles, 12.3% of the teaching titles and 16.7% of the research titles (non-White faculty constituted 12.2% of the total faculty. Non-White faculty in administration included 2 Deans, 1 Associate Dean, 1 Assistant Dean and 10 Department Chairmen.

Of the 187 non-White teaching faculty, 23% were Professors, 31% were Associate Professors, 34.2% were Assistant Professors, 9.1% were Instructors and 2.7% were Lecturers. By category, non-White faculty constituted 8.6% of the total number of Professors, 15.1% of the Associate Professors, 14% of the Assistant Professors, 22.1% of the Instructors and 5% of the Lecturers. Of the 14 non-White faculty in the research categories, all were Research Associates.

There were a total of 4,911 degrees reported (Table 15) for the 1,865 titles, for an average of 2.63 degrees per title. Obviously, these are rough estimates when related to actual faculty, as there are duplicates in both sets of data; i.e., a number of faculty have more than one title and many faculty have more than one degree in each category (e.g., 2 Bachelors degrees, etc.).

Advanced degrees totalled 3,239, for an average of 1.74 per title. Masters degrees totalled 1,586 and doctorates (including MD, OD and DDS) 1,653. Professors (1.03) and Department Chairmen (1.01) had the highest average number of doctorates.

With regard to primary area of specialization (Table 16), the distribution by title was essentially the same as that reported for total faculty in Table 8. There was a higher percentage of Health Services Administration specialists in the administrative categories (20.8% vs. 14.4% for total faculty) and a lower percentage (8.3%) in the research categories.

1980-81 Faculty Data

U.S. Schools of Public Health

Appendix II - Faculty Statistical Form

1980 - 1981

FACULTY STATISTICAL FORM

ADMINISTRATION

1. Deadline date: Dec. 15, 1980

2. Date of data: Fall term, 1980

3. Definition of Faculty Member: A person who holds an academic title or rank in the School of Public Health, has teaching and/or administrative responsibilities, and is paid in full or in part by the School.

   Full-time Faculty: A faculty member who is employed and paid by the School of Public Health for a minimum of eighty percent of the average working week.

   Part-time Faculty: A faculty member who is employed and paid by the School of Public Health for less than eighty percent of the average working week.

4. Other: Question #8 has been changed to reflect the classification of Areas of Specialization as outlined in the Report on Nomenclature and Classification of Educational Programs Offered by Schools of Public Health, December 31, 1978. Interest areas within the Areas of Specialization have been used to provide more definitive classification under each of the Areas.

(Last) (First)

FACULTY STATISTICAL FORM

The information you provide will be used to develop statistics. Your individual responses will be kept confidential. Your care and attention to completing the form accurately will be greatly appreciated.

1 2 3 4 5

/ 1 / 3 / SCHOOL: UNIVERSITY OF OKLAHOMA COLLEGE OF HEALTH
6 7

/ / 8

1. Sex: 1 [] Male [] Female

/ / / 9 10

2. Year of Birth / 1 / 3 / / /

/ / 11

3. Race/ethnic:

Race/ethnic designations as used by the School of Public Health do not denote scientific definitions of anthropological origins. For purposes of this report, a faculty member may be included in the group to which he or she belongs or identifies with. (CHECK ONLY ONE GROUP.)

1 [] American Indian or Alaskan Native - A person having origins in any of the original peoples of North America.

2 [] Hawaiian - A person having origins in any of the original peoples of Hawaii.

3 [] Asian or Pacific Islander - A person having origins in any of the original peoples of the Far East, Southeast Asia or the Pacific Islands, excluding Hawaii. For example, this area includes China, Japan, Korea, the Philippine Islands and Samoa, or the Indian Subcontinent.

4 [] Black, not of Hispanic Origin - A person having origins in any of the Black racial groups.

5 [] Hispanic - A person of Mexican, Puerto Rican, Cuban or South American or other Spanish culture or origin, regardless of race.

6 [] White, not of Hispanic Origin - A person having origins in any of the original peoples of Europe, North Africa, the Middle East.

4. Check each of the degrees that you have earned. (CHECK ALL THAT APPLY.)

/ / 12 [] Bachelors

/ / 13 [] Masters from a School of Public Health

/ / 14 [] Masters from a non-School of Public Health

/ / 15 [] Doctoral Degree from a School of Public Health

/ / 16 [] Doctoral Degree, other than M.D., O.D., or D.D.S., from a non-School of Public Health

/ / 17 [] M.D.

/ / 18 [] O.D.

/ / 19 [] D.D.S.

/ / 20 [] Other

5. In what year were you first appointed to the faculty in this School of Public Health?
/ 1 / 9 / / / / / 21 22

6a. During the academic year are you employed by the School of Public Health full-time or part-time? / / 23

1 [] Full-time (Skip to 6c.)

2 [] Part-time (Answer 6b.)

6b. If you are part-time, what percent of time are you employed by the School of Public Health? / / 24 25

_____ PERCENT

6c. Of the time you spent (full-time or part-time) what was the percentage of time spent on the following activities in the School of Public Health? Part-time faculty should show the percentage commensurate with the amount of part-time employment. The item "consultation and service" should exclude any work which is not an official activity of the School of Public Health, and for which you are independently reimbursed.

PERCENT OF TIME	ACTIVITY	
_____	Teaching	/ / / 26 27
_____	Administration	/ / / 28 29
_____	Research	/ / / 30 31
_____	Consultation and Service	/ / / 32 33
_____	Total (If part-time, this total will be less than 100%	/ / / 34 35

7. Check the titles (listed below) you hold in the School of Public Health. (CHECK MORE THAN ONE IF APPROPRIATE.)

1980-1981
FACULTY STATISTICAL FORM
EDITORIAL COMMENTS

ITEM NUMBER	ITEM TITLE	COLUMN(S)	COMMENTS
2	Year of Birth	9-10	Any birthdates in 1959 or later are to be coded "unknown" (99).
3	Race	11	Code multiple answers as "unknown" (9).
4	Prior Degrees	12-20	Code as given.
5	Year of First Appointment	21-22	Code as given.
6A	Full-time/Part-time Status	23	Code as given.
6B	Percent Part-time Effort	24-25	Code as given, except: "76" - 76% or 77% "77" - Not Applicable "98" - 98% or 99% "99" - Unknown
6C	Percentage Time to Activities	26-35	Code as given. 6A will be taken as "truth." 6B and 6C will agree with 6A -- if they don't, they will be coded "unknown" (99). An exception to this rule is the fact that full-time is defined as 80% or more. Thus, if "part-time" is checked in 6A but a percentage equal to or greater than 80% is written in 6B -- 6A will be edited to 1 = full-time. If 6A is answered 1 = full-time, 6B will be coded "not applicable" (77) regardless of what is written in 6B. 6C, columns 26-35, must sum to 80% or more; otherwise 6C will be coded "unknown" (99). If a total percent (columns 34-35) is not written but the percentages (columns 26-33) sum to 80% or more, fill in the total. Except for this case, all blank answers will be coded 01 = no answer. If 6A is answered 2 = part-time, 6B must be 79% or less. If 6B is 80% or more, edit 6A to 1 = full-time. Coding then follows rules for 6A = full-time. 6B will be coded as given as long as it is 79% or less. Round to nearest whole percent - 76 will be used to signify 76% or 77%. 6C, columns 26-33, must equal the amount listed in 6B or else all of 6C will be coded "unknown" (99). Note that if no total percent is listed in columns 34-35, but columns 26-33 do sum to the amount in 6B, the total will be edited to columns 34-35. Except in the case of a missing total percent, all blank answers will be coded 01 = no answer. If Items 6A, 6B, and 6C are unanswered, code them "unknown" (9). If 6A is not answered and only one of 6B or 6C is answered, 6A will be edited to agree. If only 6B is answered, code 6A as 1 = full-time or 2 = part-time if 6B is 79% or less. 6C will be "unknown" (9). If only 6C is answered use the sum of the answers in columns 26-33 to code both 6A and 6B keeping in mind 80% or more = full-time. If 6A is unanswered and both 6B and 6C are answered - If 6B and 6C agree then code 6A full-time if the total is 80% or more and part-time if the total is 80% or less. If both 6B and 6C have been answered, but conflict, code 6A, 6B and 6C as "unknown" (9).
7	Titles Held	36-47	Code as given.
8A	Area of Specialization (Teaching Programs)	48-49	Code as given. Multiple answers are coded unknown "09." If there is no answer in 8A, but there is only one box checked in 8B edit 8A to agree. If there is no answer in 8A, but two or more boxes are checked in 8B code 8A as unknown "09" and 8B for the numbers specified edit "other specified" into the pre-codes whenever possible. Those that cannot be edited back will be coded "other" (07). If there are no boxes checked mark unknown and code it "09."
8B	Number School of Public Health Teaching Programs	50-51	Code as given (number of departments). If no response, code "unknown" (99). Always include the answer listed in 8A in answers to 8B. Edit when necessary.

1980-1981
FACULTY STATISTICAL FORM
EDITORIAL COMMENTS

ITEM NUMBER	ITEM TITLE	COLUMN(S)	COMMENTS
9	Joint Appointment	52	Review items 10 and 11 before coding item 9. If item 9 is blank, but items 10 and 11 include answers other than "Public Health," edit item 9 to 1 = yes. If item 9 is blank, but "Public Health" has been specified in items 10 and 11, edit item 9 to 2 = no. If items 9, 10 and 11 are blank, code item 9 as "unknown." If item 9 is answered 1 = yes and both items 10 and 11 are blank, item 9 remains 1 = yes. If item 9 is answered 1 = yes and items 10 and 11 have responses other than "Public Health" item 9 remains 1 = yes. If item 9 is answered 1 = yes, but only "Public Health" has been listed for items 10 and 11, edit item 9 to 2 = no. If item 9 is answered 2 = no and items 10 and 11 are answered with responses other than "Public Health" edit column 52 to 1 = yes. If item 9 is answered 2 = no and nothing is checked in items 10 and 11, item 9 will remain 2 = no.
10	Schools of Joint Appointment	53-63	If "School of Public Health" is specified for column 63, do not code it. If item 9 is 1 = yes, columns 53-63 will be coded 1 = answered or 9 = no answer or unknown. If item 9 is 2 = no, columns 53-63 will be coded 7 = not applicable. If item 9 is coded 9 = unknown, columns 53-63 will be 9 = unknown. Edit specifies back wherever possible (see Appendix B).
11	Primary Appointment	64-65	If item 9 is 1 = yes, then columns 64-65 will be coded as given. Any "other, specifies" that do not edit back to codes given on code sheet become "other." If item 9 is 2 = no, then columns 64-65 must be 77 = not applicable. If item 9 is 9 = no answer, then columns 64-65 must be 99 = no answer.
12A	Basic Professional Education	66-69	Code columns 66-67 with the major category of the profession checked under "A"; example - Health Sciences (1). Code columns 68-69 with the specific profession checked under "A." This is a two-column field (1 = 01, 2 = 02... 9 = 09). If two specific professions are checked and they are in the same major category, code the major category in columns 66-67 code columns 68-69 as "multiple answers" (67). If two specific professions in different categories are checked, code columns 66-69 as 67 = multiple answer. Note that code 67 is to be used only when it is also used in columns 68-69. Code "other, specify" answers back wherever possible. If a specified answer cannot be edited into a specific category already listed, but does fit into a general category, code columns 66-67 with the general category and columns 68-69 with 66 = other.
12B	Area Currently Working In	70-73	Code columns 70-71 with the major category of the profession checked under "B." Code columns 72-73 with the specific profession checked under "B." If two specific professions are checked and they are in the same major category, code the major category in columns 70-71. Code columns 72-73 as "multiple answers" (67). If two specific professions are checked and they are in different major categories, code columns 70-73 as 67 = multiple answers. Note that code 67 is to be used in columns 70-71 only when it is also used in column 72-73. Code "other, specify" answers into existing codes wherever possible. If a specified answer cannot be edited back into a specific category already listed, but does fit into a general category, code columns 70-71 with the general category and columns 72-73 with 66 = other.

APPENDIX A

(ITEM 10, COLUMNS 53-63)

Responses to "other, specifies" that edit back or become a new code.

FACULTY STATISTICAL FORM
CODE SHEET

ITEM NUMBER	ITEM TITLE	COLUMN(S)	CODE
None	Respondent Status	1	2 = Faculty (Precoded).
None	Year of Response	2	Enter "0" to indicate year 1980 (Precoded).
None	Questionnaire I.D. Number	3-5	Enter last three digits of serial code in upper left corner.
None	School of Public Health	6-7	01 = University of California at Berkeley 02 = University of California at Los Angeles 03 = Columbia University 04 = Harvard University 05 = University of Hawaii 06 = University of Illinois 07 = Johns Hopkins University 08 = Loma Linda University 09 = University of Massachusetts 10 = University of Michigan 11 = University of Minnesota (Precoded). 12 = University of North Carolina 13 = University of Oklahoma 14 = University of Pittsburgh 15 = University of Puerto Rico 16 = University of South Carolina 17 = University of Texas 18 = Tulane University 19 = University of Washington 20 = Yale University 21 = University of Alabama
1	Sex	8	1 = Male 2 = Female 9 = No Answer or Unknown
2	Year of Birth	9-10	Enter last two digits of birth year. 00 = 1900 or earlier. 99 = No Answer or Unknown, 1957 or later.
3	Race	11	1 = American Indian or Alaskan Native 5 = Hispanic 2 = Hawaiian 6 = White, not of Hispanic Origin 3 = Asian or Pacific Islander 9 = No Answer or Unknown 4 = Black, not of Hispanic Origin
4	Prior Degrees	12	Bachelors: 1 = Answered, 7 = Not Applicable, 9 = No Answer or Unknown
		13	Masters of School of Public Health: 1 = Answered, 7 = Not Applicable, 9 = No Answer or Unknown
		14	Masters of Non-School of Public Health: 1 = Answered, 7 = Not Applicable, 9 = No Answer or Unknown
		15	Doctorate of School of Public Health: 1 = Answered, 7 = Not Applicable, 9 = No Answer or Unknown
		16	Doctorate of Non-School of Public Health: 1 = Answered, 7 = Not Applicable, 9 = No Answer or Unknown
		17	MD: 1 = Answered, 7 = Not Applicable, 9 = No Answer or Unknown
		18	OD: 1 = Answered, 7 = Not Applicable, 9 = No Answer or Unknown
		19	DDS: 1 = Answered, 7 = Not Applicable, 9 = No Answer or Unknown
		20	Other: 1 = Answered, 7 = Not Applicable, 9 = No Answer or Unknown
5	Year Appointed to This School of Public Health	21-22	Enter last two digits of initial appointment year. 99 = No Answer or Unknown.
6A	Full-time/Part-time Status	23	1 = Full-time 2 = Part-time 9 = No Answer or Unknown
6B	Percent Part-time Effort	24-25	Code percent as given, except as noted in Comments.
